

Product Information

NAK Engine Valve Cover Gaskets and Kits

ISO-9001/14001
ISO/TS-16949
OHSAS-18001

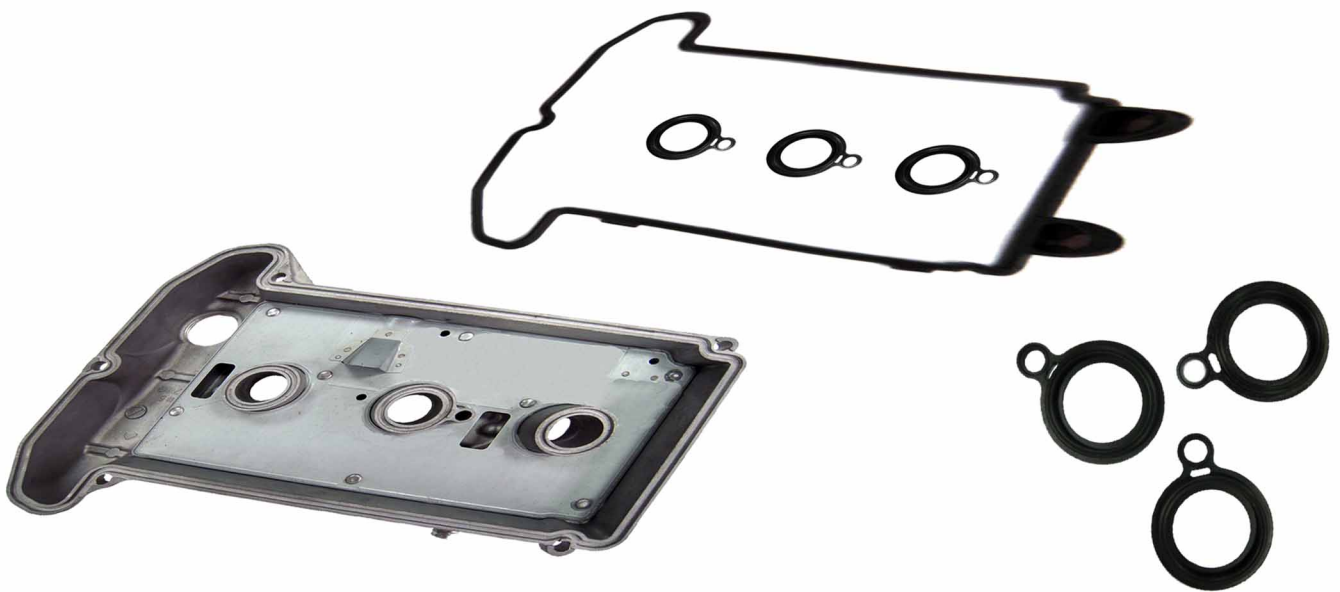

Navigator of Sealing Technology

What is Important to Engine Cylinder

Most cars use a design with overhead cams and a valve cover for service. And wherever there are high pressure cylinders or chambers, there are **valve seals** and **gaskets** to fix leakages. The valve cover gasket seals your car's engine cylinder and prevents oil leakage from inside. It is placed between the engine cylinder head and the valve cover. Oil is ever present inside an engine cylinder as a lubricant. The main function of a valve cover gasket is to prevent leakage of oil from the cylinder when the car is running.

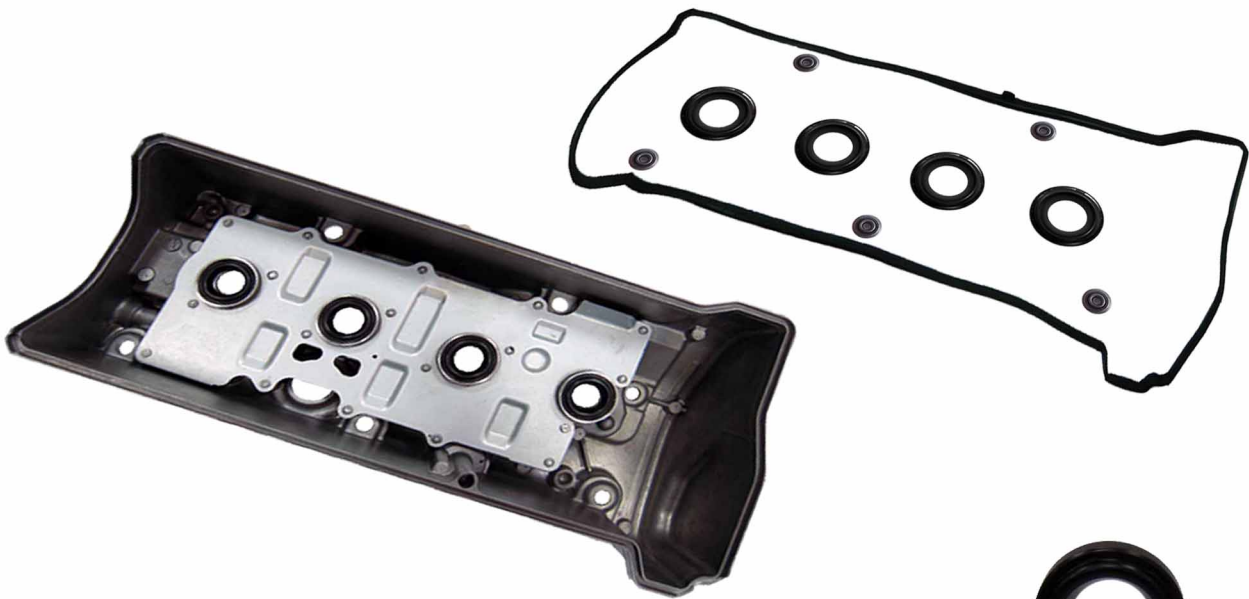

These gaskets are usually made of rubber or cork. Although they are manufactured to last long, valve cover gaskets have an inherently limited life span and over time they may get worn out. Lubricant oil leakage from cylinders can not only result into lowering of lubricant levels, it can also affect the engine efficiency. That is why it's **IMPORTANT** that you go for valve cover gasket replacement when they are worn out.

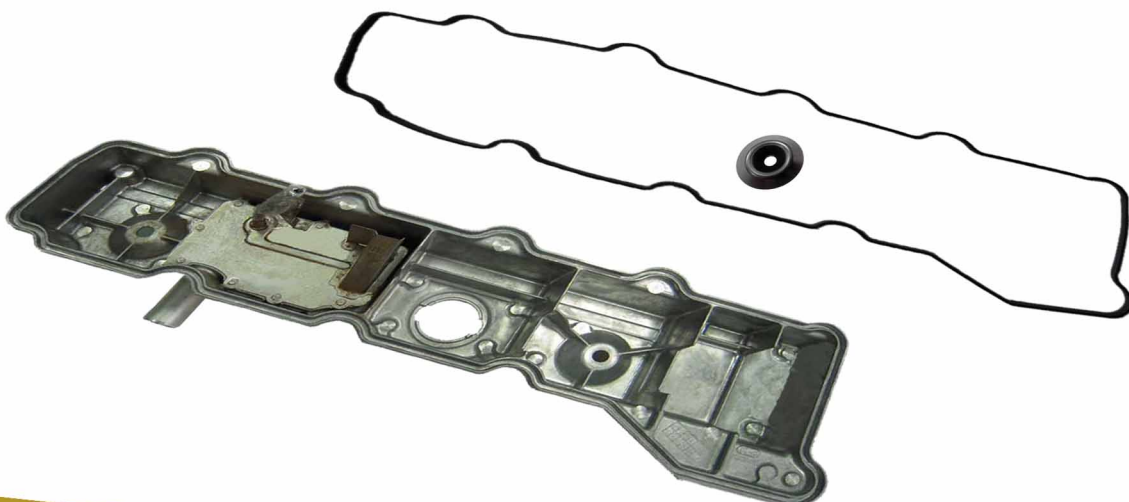

What NAK Produces for Automotive Field

NAK produces a large range of sealing parts for Automotive Application. For over 35 years NAK has been one of the largest manufacturer and supplier in the aftermarket for commercial vehicles and trucks with around 30,000 different spare parts.

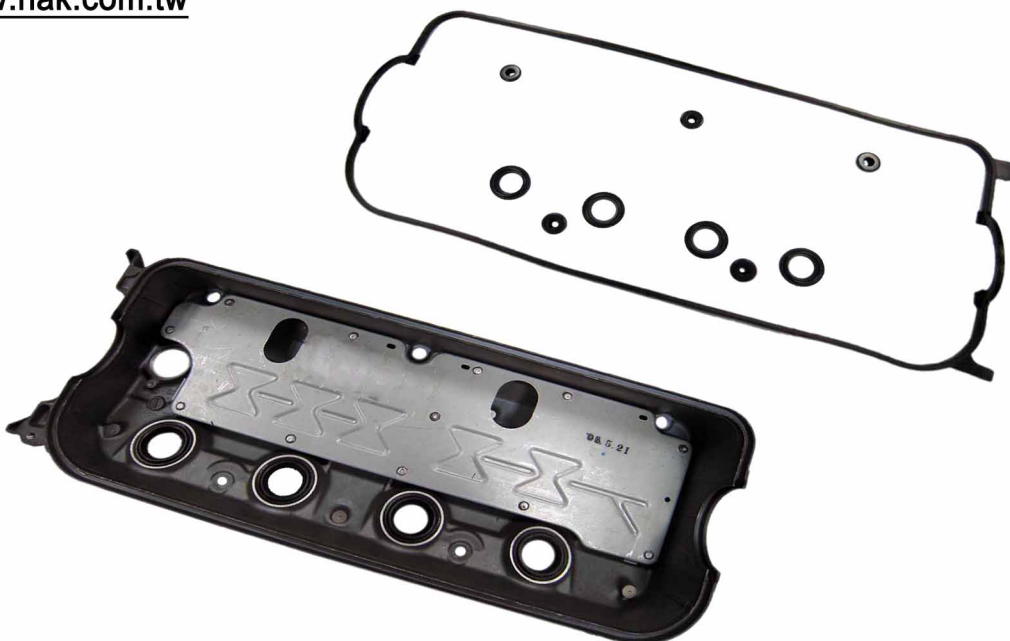

In order to be able to fulfill the requirements of the customer at all times, NAK also put practical **repair sets** together, to save customer spending time on finding and ordering the individual parts.

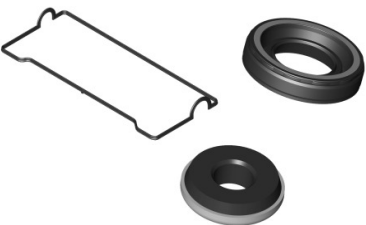

You Can be Sure to Count on NAK Products Quality, Delivery and Price

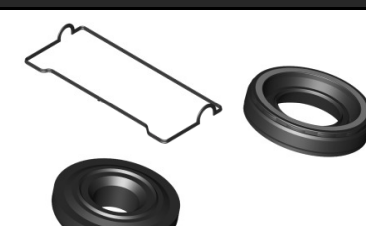

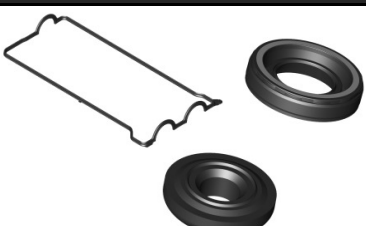

NAK engine valve cover gasket and the kit sets are in a high temperature resistant rubber ACM which is developed and compounded in house. And produced under a secured quality care and control in NAK executive production facilities specially for gasket only. We propose you to take NAK valve cover gasket as the first choice. We also welcome you to order a new open tool product in case there is not in our product list. Please contact us directly or at our website:www.nak.com.tw

Disclaimer

1. NAK products are not intended to be used, installed, or applied in or on any aerospace related instruments and/or equipment. Any such use, installation, or application is prohibited and shall void all express or implied warranties.
2. NAK disclaims any and all express or implied warranties if the products :
 - 2.1 are modified or tampered with;
 - 2.2 are misused, abused or misapplied;
 - 2.3 are used in a critical environment or specific equipment without NAK's prior written consent;
 - 2.4 are not used in accordance with the printed user instruction materials; or
 - 2.5 are damaged due to natural deterioration, decomposition or transformation of chemical structure.
3. The products may be applied in critical environment or specific equipment only upon official confirmation of the sample by NAK's technical personnel and the passing of tests conducted by buyer.
